SHOT IN THE STREET.

Sensational Ending to a Feud at Lin-

In Lincoln, Neb., the other day C. E.
Montgomery, president of the German
National bank, a wealthy and wellknown citizen, was shot and instantly
kitled by W. H. Irvine, a former resikitled by W. H. Irvine, a f dent of Lincoln, now of Salt Lake City, and a member of the Utah territorial Legislature. The trogedy happened in such a prominent place, in the midst of a large number of people and upon so important an occasion—the celebration in the city of the twenty-fifth anniversary of the admission of the State to the Union—that it stands out in bold relief when compared with similar sen-sational events which have transpired in that city. A feud had existed be-tween the principals for some time. Irvine may hang.

The Brokew Memorial.

The plans proposed by Messra Stone & Rose of New York city for the Brokaw memorial at Princeton college, Princeton, N. J., have been accepted, and work will be begun in a short time. The plan includes both a memorial building and a field, and the generous contribution of \$42,000 by Isaac V. Browhich will probably be of Indiana limestone and will be constructed in the modern renaissance style of architecture. Directly through the middle will pass an arched hallway, on each side of which are the locker rooms. These rooms will occupy the greater part of the main floor. In the basement will be placed the baths, and the large swimming tank, one hundred feet long and twenty wide, will project underground from one side of the basement, on a level with it. The covering over the tank will rise four feet above the ground level. It is planned especially for water polo and will be of regula tion size. The ground around the building will be terraced off to a level with the athletic field. This field will be sufficiently large to contain two football fields, a baseball diamond and six or eight tennis courts.

Miss Nelson represented De Pauw university directly, Greencastle being her home, and the state generally and the students of De Pauw manifested their pride and joy with cannon, bells, songs and cheers in the most enthusiastic manner. She is a tall and graceful lady of nineseen, with short hair, a pleasing, intellectual face, soft and winning voice and an earnestness in delivery that carries with it a convincing impression

of hef sincerity.

Her theme was "Industrial Freedom,"
and her criticisms on all forms of paternalism, though rather sharp and aimed squarely at such organizations as the Knights of Labor and Farmers' Alliance, Knights of Labor and Farmers' Alliance, and indirectly at protection and other forms of government interference, was received with great applause. Her main objection to such policies was that they lessened the demand for and consequently hindered the development of self reliance and individual for thought. Mr. Geyer spake immediately after Miss Nelson, and was evidently handiment from the start, but he dealt with capped from the start, but he dealt with "The Optimism of History" so forcibly

as to win honors. The honor is not a little heightened by the high standing of the judges. They were: On thought and composition— President P. B. Angell, University of Michigan; Chief Justice H. B. "Dr. Davis of Chicago read an interesting an instructive paper upon Therapeutic Inconsistencies in Medical Practice,' in which he advised the total tabooring of stimulants and narcotics in all diseases, claiming that the bad effects of them more than equaled the seeming betterment of a patient's condition immediately after their use. Dr. Davis was roundly applauded for his scholarly and pointed way of

Chorus, Other Members-"Yes, it is quite inconvenient sometimes." Then loud cheers, great applause, as the whole nest of thieves are

greatly amused at the pointed manner in which the Old One puts it. They then adjourn to pick pockets as before. But to resume.

We are somewhat surprised at the principles he advocates, but is not Dr. Davis a plagarist? Has he not, at this late date, after Dr. S. Clay Todd, the famous spe-

cialist of Grand Rapids, Mich., has published the same ideas for thirty years, just now undertaken to gain a free advertisement, by lecturing before this medical society, against the use of stimulants and narcotics? The public will find the same ideas in Dr. S. Clay Todd's advertise. ment for thirty years, and they have just been discovered by Dr. Davis,

who has possibly been reading the Grand Rapids HERALD since he arrived in Michigan. But it will be of no use to anyone but Dr. Davis. He can make what capital he can of it, by making the public believe he is a follower of Dr. S. Clay Todd, and in no relation in principle or practice to his allopathic brethren; but his associates, the allopathic physicians, although they loudly applauded his remarks, cannot carry out his precepts, and do not

The fact is the Allopathic Practice is someting with some in the confidence of the dear people, and needs hoistering with some good talk and some decent principles, but simply trying to catch on to cook talk and some decent principles, but simply trying to catch on to to cure diseases, which is what the public demands in a physician.

Dr. Davis leaves his amoriates in the same situation that Col. Bob Ingersoil does his hearers. Col. Bob tells them how they can escape rehgion, but gives them nothing to take the place of it.
